Description

- **Application area:** Connecting 34 mm steel pipes in drive shafts
- **Material:** Steel, hot-dip galvanized for high stability and corrosion resistance
- **Installation:** Bolted using included M8×50 screws
- **Special feature:** Increased stability and durability compared to welded connections

The **pipe connector shells** provide a reliable solution for joining 34 mm steel pipes in drive shafts. Unlike welded connections, these shells offer enhanced stability and long-term durability.

They are securely fastened to the steel pipes using the included **M8×50 screws**, ensuring a firm and dependable connection.

Thanks to their hot-dip galvanized finish, the connector shells are highly resistant to corrosion, making them ideal for long-term use in demanding environments.
