Description

- **Application area:** Fastening of films in early-harvest tunnels and as planting line with markers for uniform plant spacing
- **Material:** UV-stabilized polyester
- **Breaking load:** 50 kg
- **Length:** 100 m

The **Polyestercord 5 mm** is a braided polyester rope ideally suited for fastening films in early-harvest tunnels. Alternatively, it can be used as a planting line equipped with markers to ensure consistent plant spacing.

Thanks to its UV stabilization, the cord is highly durable and resistant to weathering. With a breaking load of 50 kg, it offers strong performance for a variety of applications. Each roll contains 100 m of cord, providing sufficient material for practical use.
