

## **Overview**

## Plug, small for pinion house

Product number: 32200005

## **Description**

- Application: End cap for the opposite side of the rack protection tube
- Material: Plastic
- Mounting: Push-fit installation
- Function: Completes the rack protection system and prevents contamination
- Benefit: Enhances safety and durability of rack drive systems

The **Small Plug for Pinion Housing** is used on the opposite end of the rack protection tube to seal the system. It prevents dirt ingress and ensures a clean, finished appearance. Best used in combination with the large plug and pinion housing cover.
