

## **Overview**

## **Cloth retainer 19**

Product number: 21100100-1

## **Description**

- Application area: Return transport of shading fabric in horizontal shading systems
- Installation: Clamped onto 19 mm aluminum pipe tool-free
- Material: Plastic flexible, UV-resistant, and gentle on fabric
- Connection: Integrated pressure lock prevents unintentional release
- Special features:
  - o Ideal for lightweight aluminum pipe systems with wide truss spacing
  - o Compatible with gliders, clamping parts, and 19 mm aluminum pipes
  - o Easy handling during installation and maintenance

The Cloth retainer 19 mm is a functional component for securely returning shading fabric in horizontal shading systems. It is clamped tool-free onto the 19 mm aluminum pipe and reliably secured by an integrated pressure lock. The flexible plastic material protects the fabric from damage and ensures a durable, low-maintenance connection—ideal for modern greenhouse installations with lightweight pipe systems.
