Description

- **Application:** Greenhouse shading system
- **Material:** Acrylic and aluminum fibers
- **Shading Rate:** Approx. 55-60%
- **Width:** 450 cm
- **Color:** Alu-Green
- **Feature:** Moisture-regulating and reflective

FFS 2/4 alu-green is a high-quality climate control fabric developed for use in greenhouses. Its woven aluminum threads reflect solar radiation before it enters the structure—helping to reduce internal temperatures efficiently.

The acrylic component absorbs ambient moisture, contributing to a drier and more hygienic greenhouse environment. Simple to install using S-hooks, it's available in a variety of widths and colors, offering flexible integration into different greenhouse setups.

With its thoughtfully balanced fiber blend, it provides optimal light transmission and thermal control—ensuring your plants are protected from excessive heat and humidity.

Note: Price refers to material only - additional costs may apply for cutting or finishing services.

Product information

Energy Saving:	60 %
Shading:	55 %
Direct Light transmission:	45 %
Flame retardant (DIN 4102 B1):	No
UV Stabilization:	5 years (climate: Central Europe)
Weight (+/- 10%):	115 g/m ²
