Description

- **Application:** Open woven fabric for optimal air circulation in greenhouse environments
- **Material:** Interwoven acrylic yarns for reliable moisture transfer
- **Width:** 325 cm
- **Shading Rate:** Approx. 40%
- **Energy Savings:** Approx. 15%

PhormiTex Lumina 40 O - 325 cm is a durable open-weave fabric designed for use in high-light greenhouse environments. It delivers a balanced shading effect with the added benefit of enhanced air exchange—even when deployed without ventilation gaps.

Acrylic yarns ensure steady humidity management, while translucent woven bands improve light diffusion across the plant canopy, contributing to stronger photosynthetic efficiency and uniform growth.

Note: Price covers base material only. Processing or sewing services may incur additional fees.

Product information

Energy Saving:	15 %
Shading:	40 %
Direct Light transmission:	60 %
Flame retardant (DIN 4102 B1):	No
UV Stabilization:	600 kLy
Weight (+/- 10%):	61 g/m ²
