Description

- **Application:** Budget-friendly knitted shading screen for greenhouse environments
- **Material:** Lightweight textile to support climate balance
- **Width:** 4.30 m
- **Use Case:** Designed for use as a shading screen

EcoScreen FR55F white open - 4.30 m is a lightweight, functional knitted fabric designed for horizontal or hanging shade screen systems in greenhouse settings. It provides simple yet effective coverage to reduce light levels, support temperature moderation, and protect sensitive crops throughout the day.

Note: Material pricing only. Finishing and tailoring available upon request and billed separately.
