Description

- **Application:** Connection between double film and spiral hose in greenhouse systems
- **Material:** UV-stabilized plastic blend for high durability
- **Function:** EPDM check flap prevents backflow of inflated air
- **Installation:** Secured using a hose clamp
- **Special feature:** Highly resistant to environmental influences
- **Packaging unit:** 40 pieces

The **film inflation valve with check flap - PU: 40 pcs** provides a reliable connection between double-layer film and spiral hose. The integrated EPDM check flap prevents the backflow of previously inflated air, ensuring a stable air cushion.

Thanks to the proven plastic blend, the valve is UV-stabilized and exceptionally durable. Installation is quick and secure using a hose clamp.
