Description

- Application area: Connecting two screen profiles at an angle ideal for side-suspended fabric
- Installation: Screwed into the profile ends includes screw and pre-cut thread
- Material: Aluminum lightweight, strong, and corrosion-resistant
- Packaging unit: 50 pieces
- Special features:
 - o Compatible with all common screen profile types
 - o Enables stable angled connections in complex system layouts
 - o Ideal for constructions with side-suspended shading fabric

The **Angled connector for screen profiles** is a versatile component for creating stable corner connections between two screen profiles. Especially in side-suspended shading systems, it ensures a secure and precise fit. Made of aluminum, it offers high strength at low weight and excellent corrosion resistance—perfect for long-lasting greenhouse installations.
