Made from high-quality natural fiber, the coconut rope offers excellent durability and strength. With a diameter of approx. **8-10 mm** and a length of approx. **40-50 m/kg**, it is especially resilient and long-lasting.

Thanks to its biodegradable nature, coconut rope is a sustainable alternative to synthetic binding materials. It supports the natural growth of plants without harming the environment.

An essential tool for gardeners, nurseries, and landscape designers who value secure and environmentally responsible fastening solutions.
