Description

- **Application:** Shading systems for greenhouses
- **Material:** Knitted fabric with white and transparent yarns
- **Width:** 530 cm
- **Feature:** Acrylic yarns help maintain balanced humidity

EcoScreen 70 FR white – 530 cm is a large-format knitted fabric for suspended or overlay shading applications. Its translucent structure ensures light transmission is preserved, enabling efficient photosynthesis while improving temperature and humidity balance inside the greenhouse.

The fabric is applied as a combined shading and energy screen—providing a lightweight solution to support stable climate conditions in protected cropping systems.

Note: Base price includes fabric only. Tailoring or processing services are quoted separately.
