Description

The pinion house unit TU 5-22 works as a drive for racks 22 in greenhouse ventilations.

A counter roller enables reliable and gentle guidance of the rack. Therefore you will profit from low abrasion of your ventilation system.

Thanks to a centred bronze ring, that works as a bearing, the pinion house unit especially fits ventilation systems, which have to withstand high weights.

For drives with 34 mm steel tubes.

Created at 27.06.2025.

* Our offers are directed exclusively to companies. We do not conclude contracts with consumers. All prices excl. VAT plus shipping costs and possible delivery charges, if not stated otherwise.
