

Overview

Sleeve coupling P26.5

Product number: 32300200

Image

Description

- **Application:** Coupling element for 34 mm drive shafts in push-pull drive systems
- **Material:** Galvanized steel
- **Function:** Allows quick release of the shaft without removing adjacent pinion drives
- **Installation:** Screw-on - no welding required
- **Use case:** Ideal for maintenance and modular greenhouse systems
- **Ridder Article No.:** 419404

The **Sleeve coupling P26.5** is a practical connector for 34 mm drive shafts in push-pull systems. It enables tool-free disconnection of the shaft, making it ideal for quick maintenance or replacement of pinion drives. Its galvanized finish ensures long-term corrosion resistance.
