# Description

- **Product:** FilmProtect stabilizing tape
- **Width:** approx. 2.8 cm
- **Length:** 100 m (roll)
- **Packaging unit:** 1 roll
- **Application area:** Fastening and protecting bubble wrap on greenhouse walls
- **Material:** Durable, weather-resistant plastic tape
- **Function:** Reinforcement at clamping points, tear-out protection, wind stabilization
- **Advantages:** Extends the lifespan of the film, easy to install, large-area fixation

The **FilmProtect stabilizing tape**, with a width of approx. 2.8 cm, is designed for professional fastening of bubble wrap to greenhouse walls. It is applied at the clamping points of the adhesive fasteners and protects the film from excessive stretching and mechanical stress.

Thanks to its large-area fixation, the tape also acts as wind protection and reliably prevents the film from tearing out—even in strong gusts. Installation is quick and efficient, for example using compact wire tensioners.
