Product number: 40110060

Description

Created at 19.05.2024.

* Our offers are directed exclusively to companies. We do not conclude contracts with consumers. All prices excl. VAT plus shipping costs and possible delivery charges, if not stated otherwise.

The **Cable Unwinder Cable Caddy X** is the ideal tool for unwinding wires and cables vertically on cable reels. This means that the cables do not twist on themselves. This saves extra effort when laying cables and protects the material from unnecessary damage. The vertical mode of use means that the Cable Caddy X cable unwinder can also be used with damaged cable reels without any problems.

Thanks to its sophisticated design, the CableCaddy X has a secure footing - even when unwinding larger cable reels or pulling the cable a little harder
Dimensions: 305 x 305 x 118 (mm)

Ball bearing support rollers

Our carrying rollers are particularly stable and durable, as these are equipped with **one ball bearing** on each side, which are firmly screwed to the base plate.
These carrying rollers are used exclusively for the Cable Caddy X.

Mechanically attached rubber feet

The rubber feet of our **cable caddy** are not glued, but mechanically attached.
This ensures a firm grip at all times, even on slippery industrial floors.
