Description

- **Application:** Shading fabric for greenhouses to regulate temperature
- **Material:** Acrylic and aluminum fibers
- **Shading Rate:** Approx.68%
- **Width:** 350 cm
- **Color:** Alu-orange
- **Mounting:** Can be installed directly using S-hooks without further finishing
- **Features:**
 - Reflects solar radiation to reduce heat buildup
 - Absorbs moisture from evaporation for a drier climate
 - Made in Germany

FFS 4/4 alu-orange - 350 cm is a high-performance shading fabric crafted from woven aluminum and acrylic fibers. Its standout feature is its ability to reflect solar radiation before it penetrates the greenhouse interior—helping to lower temperature and reduce thermal stress on crops.

The acrylic fibers contribute to climate control by absorbing ambient humidity, helping maintain a healthier, drier environment that discourages fungal development. The orange-colored weave adds a warm-toned visual presence and is ideal for growers who value both performance and presentation.

Installation is simple using S-hooks—no custom finishing required.

Note: Price refers to material only. Additional charges may apply for cutting or sewing services.

Product information

Energy Saving:	60 %
Shading:	68 %
Direct Light transmission:	35 %
Flame retardant (DIN 4102 B1):	No
UV Stabilization:	5 years (climate: Central Europe)
Weight (+/- 10%):	115 g/m ²
