

Overview

TGU shaft hanger-set short USA - PU = 25 pcs

Product number: 24100502

Description

The shaft hanger repair set enables you to replace broken shaft hangers quickly and easily. You will profit from less labour for the repair as you don't have to dismantle the shaft - our unique hangers are assembled around it.

The shaft hanger repair set also extends the life of other related parts (motors, drive pipes, structure stability), due to the specially formulated inner plastic ring, which serves as bearing support and holds the drive line in its optimal position.

It is designed to fit most greenhouse types, and can be customized on demand. The sturdy and durable components of this set can also be used in new and old greenhouses, where they will add flexibility of the system.
