Description

- **Application:** Open shading fabric for optimal air circulation in greenhouses
- **Material:** Interwoven acrylic yarns for reliable moisture exchange
- **Width:** 480 cm

PhormiTex Lumina 40 O is an open shading fabric primarily used in greenhouses where shading is essential due to intense sunlight. It ensures optimal air circulation even when operated without ventilation gaps.

The fabric offers a shading level of 40% and energy savings of 15%. The interwoven acrylic yarns support reliable moisture exchange, while the integrated translucent bands enhance light diffusion to improve plant photosynthesis.

Note: Price refers to material only. Additional charges may apply for customization (e.g. cutting, sewing).

Product information

Energy Saving:	15 %
Shading:	40 %
Direct Light transmission:	60 %
Flame retardant (DIN 4102 B1):	No
UV Stabilization:	600 kLy
Weight (+/- 10%):	61 g/m ²
