Description

- **Application area:** Sealing open pipe ends in shading systems
- **Dimensions:** Suitable for 50 × 50 mm square pipes
- **Material:** Plastic
- **Packaging unit:** 1 piece
- **Special features:**
 - Provides a clean finish and prevents injury at pipe ends
 - Ideal for low greenhouses with walkable frame structures
 - Also available in packs of 100 pieces

The **Ribbed end cap 50.50** ensures safe and clean sealing of open square pipes with a 50 × 50 mm cross-section. Especially in low greenhouse constructions, it protects against injuries caused by bumping into pipe ends while also providing a neat appearance. The robust plastic design guarantees easy installation and long-lasting durability—available here as a single unit.
