

Overview

EcoScreen 50 FR white - 4,30 m

Product number: 19005043

Options

Width (cm):

☐ 325☒ 430☐ 530

Description

- **Application:** Closed knitted shade screen for overlay or suspended greenhouse systems
- **Material:** Transparent and white bands for controlled light diffusion
- **Width:** 430 cm
- **Feature:** Moisture-balancing acrylic fibers included

EcoScreen 50 FR white - 430 cm delivers light-filtering functionality in a wider format for larger greenhouse spans. It ensures gentle shading while allowing critical daylight to pass through—creating photosynthesis-friendly growing conditions throughout the day.

Its breathable knit texture contributes to natural ventilation and enhances internal climate control. Ideal for growers seeking efficient shading with low material weight and easy handling.

Note: Listed price is for base fabric only. Additional services such as cutting or finishing may be offered separately.
