Description

- **Application area:** Connecting 32 mm steel pipes in push rod drives
- **Material:** Die-cast aluminum for high stability
- **Installation:** Inserted internally into the steel pipes and interlocked by tightening the centrally positioned grub screw

The **Steel pipe connector Ø 32** is a reliable solution for connecting 32 mm steel pipes in push rod drives. The component is inserted internally and securely fixed by tightening the centrally positioned grub screw.

Thanks to its high-quality die-cast aluminum construction, the connector offers excellent stability and corrosion resistance, making it ideal for use in demanding environments.
