Description

- **Application:** Bearing support for 34 mm drive shafts in ventilation and shading systems
- **Design:** Two-piece stamped steel housing with replaceable ball bearing
- **Mounting:** Includes mounting holes for M8 screws
- **Material:** Galvanized steel (housing and bearing)
- **Bearing Insert:** SB 207 with set screw
- **Features:**
 - Sturdy construction for long-term use
 - Replaceable bearing insert for easy maintenance
 - Ideal for professional greenhouse installations

Pillow block 1" with bearing is a proven component for supporting 34 mm drive shafts in greenhouse ventilation and shading systems. Its two-piece design allows for easy bearing replacement, while the galvanized finish ensures durability and corrosion protection—ideal for continuous use in demanding conditions.
