## Description

- **Application area:** Component of the TGU delay set for limiting the sliding clamp
- **Material:** High-quality steel for secure fixation
- **Function:** As part of the TGU delay set, it reduces the movement of the delayed fabric panel

The **Hose clamps 12.22 for tube mount reduction set - TGU - loose** are an essential component of the TGU delay set. They act as a stop for the sliding clamp and ensure controlled movement of the delayed fabric panel.

Thanks to their high-quality steel construction, the hose clamps provide reliable fixation and are ideal for long-term use in shading systems.
