Description

An lightproof, but extremely absorbent fleece for optimal water storage and distribution. The Aquafil irrigation mat is a further development of the standard irrigation mats. Aquafil can be laid very neatly. Thanks to its high-capillary fibres the water is evenly distributed even on imperfect surfaces, that provides an optimal supply of water to your plants.

Pre-cut sections of 30 x 50 cm

Capacity: approx. 3l / m²

Weight: 200 g / m²
