Description

- **Application area:** Horizontal shading systems
- **Function:** Prevents the fabric from entering the adjacent girder section during closing
- **Material:** Stainless steel (Inox) – corrosion-resistant and durable
- **Installation:** Used in combination with the Inox binder clamp
- **Special features:**
 - Protects the fabric from mechanical stress
 - Enables precise guidance of the shading fabric
 - Ideal for professional greenhouse installations with horizontal shading systems

The **Screen stop finger** is a specially designed component for shading systems. In combination with the Inox binder clamp, it ensures that the fabric does not enter the adjacent girder section during closing. Made of corrosion-resistant stainless steel, it offers a long-lasting and reliable solution for professional greenhouse installations.
