63 mm

## **Description**

- Application: Even winding of drive cables in greenhouse shading systems
- Material: Impact-resistant plastic for high durability
- Capacity: Winding length of 570 cm
- Installation: Can be retrofitted onto the drive shaft

• Feature: Two-piece design with hose clamp connection

Cable drum 2&quot - - type III ensures smooth and orderly winding of drive cables in shading systems by means of its pre-grooved inner surface. This guides the cable precisely and helps prevent overlap and wear.

The two-shell construction allows for easy retrofitting onto existing drive shafts. The drum halves are connected with a hose clamp, and the drum is fixed to the shaft using a set screw.

Made of durable, impact-resistant plastic, the drum is gentle on cables and extends their service life. Suitable for drive cables up to 3 mm in diameter.
